

# BI SmartLINK®

## THE POWER OF MOBILE APP MONITORING

Increase positive outcomes by placing the tools individuals need to be successful and accountable in the palm of their hands. Mobile communication through BI SmartLINK® is immediate, convenient, and time-saving for both officers and clients.

## ENHANCE COMMUNICATION, INCREASE ACCOUNTABILITY

Agencies use SmartLINK to simplify communication with clients and provide them with access to valuable information, so they feel prepared and motivated to comply with their conditions of release. Communication tools include secure text messaging, video conferencing, access to community resources and their calendar, and notification reminders. Plus, the intuitive home screen is designed to increase accountability by prioritizing tasks for the client.

## LEAST RESTRICTIVE FORM OF SUPERVISION TECHNOLOGY

SmartLINK offers agencies a reliable supervision technology without the need for a body-worn device. Clients can easily answer self-report questions and complete check-ins. The app biometrically authenticates the identity of the client by comparing a new photo against photos established at enrollment. Liveness detection technology adds the ability to verify that a live person is completing the check-in.

## REDUCE TIME SPENT ON ADMINISTRATIVE WORK

Agencies and courts save time with SmartLINK as administrative functions are streamlined and automated. Giving clients the ability to submit information and schedules electronically through the app reduces the amount of paperwork officers need to handle, while also providing visibility of all pending approval requests.

## KEY FEATURES

- Easy-to-use app downloaded on a client's smartphone or BI Mobile® device
- Tiered program options—select based on client risk and needs
- To-do list enables clients to view all tasks in one place and complete requirements
- Calendar, reminders, and the ability for clients to submit required paperwork helps increase compliance and positive outcomes
- Requests feature provides clients with visibility after requests are submitted
- Enhanced client enrollment process ensures quick app activation
- Liveness detection provides an automated, nonintrusive approach to verify a live person at check-in
- Records confirmation of client activities and location compliance
- iOS and Android compatible
- Full app translation available in 16 languages
- Officers manage clients on SmartLINK through BI TotalAccess®
- Monthly training webinars available for officers
- Pairs with BI SmartBAND™ 1.0 for distance-based location tracking
