

Simplify the Procurement Process

POWERED BY NASPO VALUEPOINT

BI Incorporated is proud to be an awarded supplier under the NASPO ValuePoint® Master Agreement for Electronic Monitoring (MA #99SWC-NV26-29624). Competitively solicited and publicly awarded by the Lead State of Nevada, this contract gives public-sector agencies access to the full continuum of electronic monitoring devices and solutions from BI, supporting the effective management and supervision of individuals in need of monitoring.

A SMARTER WAY TO PROCURE

Public agencies face constant pressure to do more with less, especially when it comes to procurement. Cooperative purchasing offers a practical solution: instead of every agency doing it alone, members pool their needs and rely on competitively sourced contracts. This means less time spent navigating complex bids, consistent access to vetted suppliers, and the assurance that every dollar is spent responsibly. It is a way to secure quality solutions, fulfill legal requirements, and keep projects moving without the administrative burden of traditional procurement.

WHY NASPO VALUEPOINT?

With over 75 years of public procurement expertise and the collective purchasing power of all 50 states, NASPO ValuePoint delivers compliant, cost-effective solutions from industry-leading suppliers.

When your agency utilizes these established national contracts, you meet your competitive bidding obligations without the cost, administrative workload, or months-long delay of a standalone RFP.

YOUR PATH TO PROCUREMENT SUCCESS

- **Built-in Compliance:** Skip the months-long RFP process. These contracts already satisfy strict public procurement requirements.
- **Lead State Oversight:** Every agreement is competitively structured, reviewed, and managed by a state procurement office, offering a vetted framework.
- **Administrative Relief:** Minimize paperwork, reduce exposure to bid protests, and spend less time on contract administration.
- **Local Flexibility:** Agencies can execute a local Participating Addendum to seamlessly address their own needs off the national master contract.

GET STARTED FAST

If your State Procurement Office has executed a Participating Addendum for NASPO ValuePoint's Electronic Monitoring Portfolio, local public entities do not have to start from scratch. County probation departments, municipal courts, and sheriff's offices can quickly piggyback on the state-level agreement, using pre-negotiated terms, conditions, and pricing.
