

BI VeriWatch® 2

BUILT FOR SECURITY, DESIGNED FOR LIFE

BI VeriWatch® 2 is intelligently engineered to support discreet and effective client supervision. This wrist-worn location tracking device offers enhanced security, improved battery life, and a location acquisition frequency as little as one minute. VeriWatch 2 is designed to look like a consumer smartwatch, so clients can wear it comfortably and confidently in public, at work, or at home.

ENHANCED SECURITY

VeriWatch 2 has a fiber-optic strap with built-in tamper detection that alerts the officer when the strap is cut or removed. Plus, scheduled, random, and on-demand check-ins use biometric facial comparison and liveness detection technology to verify client identity.

ACCURATE LOCATION TRACKING

Using GNSS and Wi-Fi, VeriWatch 2 can be configured to collect a location point every minute. Wi-Fi signals enhance the ability to obtain accurate location information, even in impaired urban canyons, densely populated environments, or remote terrain. The use of multiple satellite signals from different systems provides redundancy in case of signal blockage or interference, to help ensure that location data is still collected.

CONVENIENT CHARGING

The device has up to 48 hours of battery life on a single charge, and up to 96 hours when paired with the recharger. The portable slide-on recharger enables clients to easily charge on the go, with 100% charge in less than two hours.

COMMUNICATION TO INCREASE COMPLIANCE

Officers can send push notifications and custom messages directly to the client's device. The device supports full translation in 16 languages, and incoming messages are automatically translated into the client's chosen language. Clients use the intuitive touch screen to read messages, acknowledge notifications, and complete check-ins with just a few taps. VeriWatch 2 is compatible with BI SmartLINK® for more communication options.

KEY FEATURES

TRACKING UNIT

- Size: 2.2" H x 1.7" W x 0.7" D
- Weight: 1.45 oz.
- Strap and proximity tamper detection
- Case tamper detection and no-motion alert
- 48-hour battery life
- Cordless recharging in under two hours
- GNSS and Wi-Fi location tracking
- High-frequency pursuit mode
- Biometric authentication
- Strap available in Black or Glacier
- Search and retrieve functionality
- Available in 16 languages
- Configurable primary, exclusion, and inclusion zones
- Proprietary real-time operating system
- LCD touch screen with vibration and audible alerts
- Mil-Std 810H ruggedness
- Stores location points for seven days without cellular connectivity
- Device data is preserved, even if battery is depleted
- Pairs with BI SmartLINK
- Power-saving beacon option
